MD: Hasan

Full Stack Developer

Email: mdhasan26096@gmail.com
Mobile: (+880)1728026096 (WhatsApp)
Address: Dhaka, Bangladesh
Portfolio | GitHub | LinkedIn | CodeChef | codeforces

Skills:

Expertise: JavaScript, TypeScript, Node.js, Express.js, Mongoose, Prisma, MongoDB, Firebase, JWT, Socket.io, WebSocket, Redis, BullMQ, deployment with VPS (DigitalOcean, Hostinger, etc), CI/CD.
Comfortable: C, C++, SQL, Redux, Next.js, React.js, React Router, Context API.
Familiar: TanStack Query, AOS, Axios, MUI, Ant Design, DaisyUI, React Bits.
Payment: Stripe, PayPal, PayFast, and SSLCommerz.

Professional Experience

Backend Developer
SM Technology (28/09/2024 - Present)

- Designed and developed scalable backend architectures with Node.js, Express, and mixed databases (MongoDB, SQL)
- Implemented real-time systems using WebSockets and Socket.io and payment integrations (Stripe, PayPal, SSLCommerz)
- Managed CI/CD-based deployments on DigitalOcean for reliable delivery
- Optimized API performance through cross-functional collaboration with frontend teams

Project:

Tournament Management: Live Link || Frontend || Backend.
This is a modern, responsive, and highly interactive web application designed to handle tournament operations, manage user dashboards, and provide a seamless experience for participants and organizers.

Features :

- Authentication for Players, Coaches, Referees, and Admins, with team creation, roster management, tournaments, divisions, and leaderboards.
- Match scheduling, score tracking, standings management, camp registrations, and dynamic waitlists.
- Secure payment processing with discount support and real-time notifications for important activities and updates.

Technology: Node.js, TypeScript, Express, Prisma (Postgres), Stripe, Firebase Admin (FCM), Nodemailer + PDFKit, Multer, Cloudinary, Zod, JWT.

Booking management: App Link || Backend Code.
A service booking platform backend that connects customers with specialists through appointment scheduling, secure payments, real-time notifications, and service discovery.

Features :

- Browse and search services by category, schedule appointments with specialists, manage availability and time slots
- Secure payment processing with PayFast, subscription management, earnings tracking, invoicing, and payout management
- Email notifications via Brevo, Firebase push notifications, reviews/ratings system, favorites, search history, and admin content moderation

Technology: Node.js, TypeScript, Express, Prisma (Postgres), Stripe, Firebase Admin (FCM), Nodemailer + PDFKit, Multer, Cloudinary / DigitalOcean Spaces, Zod, JWT.

Education:

Diploma in Computer Science and Engineering(2020-2024)
Barguna Polytechnic Institute, Barguna.
BSc in Computer Science and Engineering (CSE)
Northern University of Bangladesh(2027)

COURSES:

Complete Web development course. (MERN)
Programming Hero (01/01/2023 – 01/06/2023) Level-1(Batch-7) (**certificate**)
Full-stack development.
Programming Hero Level 2 (Batch-2) (Completed)
Languages: Bangla (Native) | English (Professional Working Proficiency)
